GAB and MondayCoffee agree on sales partnership

The standard is in fashion

Munich, April 4, 2017 – **IT consultancy firm GAB and collaboration specialist MondayCoffee, both of them certified Microsoft gold partners, enter into a partnership. The out of the box solutions MondayCoffee has developed within more than ten years of experience with collaboration projects based on Microsoft technology will be distributed in Germany by GAB.**

Being ready for the digital transformation, increasing the company's productivity or just simplifying work life – there can be many reasons to introduce collaboration solutions. But all customers have one thing in common: They want to focus less on the technology and its operation and more on the essentials of their work.

„In the past, we implemented many SharePoint projects with a high degree of customer-specific adaptations. Today, we are confident that a preset collaboration solution built on SharePoint meet our customers' requirements in a better way," Harald Ehrl, founder and CEO of GAB Enterprise IT Solutions GmbH, explains.

The focus is on user acceptance

MondayCoffee's collaboration solutions – [CoffeeNet 365](#) and [EspressoNet 365](#) – combine the reliability and security of the Microsoft technology with a user-friendly interface and standardized features for an efficient collaboration within and outside of companies.

„MondayCoffee's solution is a well-made combination of predefined best practice templates and the right degree of flexibility for customer-specific adaptations. Project phases as well as the implementation of such a solution are shortened, so together with our clients we are able to concentrate even more on a successful user acceptance," Ehrl states reasons for the partnership with MondayCoffee.

Reto Meneghini, CEO and founder of MondayCoffee, adds: „Installing a tool, no matter how good it is, does not simultaneously change the people's behavior and their way to

collaborate. Our solution often acts like a catalyst for a change in collaboration. We are delighted to have found a valuable partner in GAB that promotes the collaboration practices of the digital future with us.“

About GAB

As an expert for cloud solutions, GAB realizes modern hybrid, public and private cloud environments. Due to our advanced knowledge, we are able to design nearly every cloud scenario to support our clients on their way to modern workplace environments. Thus, companies become more flexible and are able to sustainably increase their staff's productivity. Being a CSP direct partner we are a preferred Microsoft partner for the distribution and administration of Microsoft cloud services. This gives our clients the advantage of getting expert knowhow in setting up and operating cloud services, as well as one-stop accounting. Administration processes and projects are conducted easily with us. More information can be found at www.gab-net.com.
